

PPO MRL Established for Canada

On January 16, 2013, Canada's Pest Management Regulatory Agency (PMRA) announced the newly established maximum residual level of 300 ppm for propylene oxide on English Walnuts. For your convenience, a copy of the Propylene oxide MRL information has been attached. To view the database for Canada's MRLs please visit: <http://pr-rp.hc-sc.gc.ca/mrl-lrm/index-eng.php>.
